

Butterfly Mix

Assorted Wildflowers

Wildflowers are an excellent addition to drought tolerant landscapes. Tree of Life Nursery offers a variety of customized native wildflower blends for use in southern California gardens. Our seed is supplied by *S & S Seeds of Carpinteria, California*. This mixture of annuals contains wildflowers that attract butterflies and offer both nectar and larval hosts to our native species. For a more complete butterfly garden, combine these with other native butterfly favorites like Milkweed (*Asclepias*), Wild Lilac (*Ceanothus*), Buckwheat (*Eriogonum*) and Coyote Mint (*Monardella*).

Botanical Name	Common Name	Flower Color	Life Cycle
<i>Lasthenia californica</i>	Goldfields	yellow	annual
<i>Plantago erecta</i>	Plantain	greenish-white	annual
<i>Gnaphalium bicolor</i>	Everlasting	cream	annual
<i>Lupinus nanus</i>	Sky Lupine	blue and white	annual
<i>Castilleja exserta</i>	Owl's Clover	dark pink	annual

COVERAGE :	
1 ounce	± 150 square feet
3 ounces	± 500 square feet
6 ounces	± 1,000 square feet
12 ounces	± 2,000 square feet
1 pound	± 3,000 square feet
fifteen pounds	± 1 acre

Planting instructions: Seedbed or area to be seeded should be prepared by light cultivation and weed removal. Optimum planting season is November 15 through March 31, just prior to anticipated rain. Broadcast seed evenly over soil surface. Rake the area lightly to incorporate seed into the top 1/4" - 1/2" of soil. A top dressing of composted organic mulch (not manure) is recommended to help maintain even moisture during the germination period.

Maintenance: Irrigate just enough (between rains) to maintain soil moisture during germination. After germination until initial flowering, sprinkle the area to a depth of about 2". After flowering, little to no supplemental water should be needed. Allow the seed heads to remain after flowering. This encourages reseeding for next year.
